

Migration Director *Enterprise* Objection Migration & Promotion

Unitask's Migration Director *Enterprise* eliminates the manual challenges of packaging and deploying changes required between instances of Oracle EBS. With a simple "Point-Click-Change" approach, changes are compiled, packaged and ready for migration in minutes, not hours, with no errors and no worries. Compile and change with confidence all while remaining safe, secure and compliant.

Critical Benefits

- Zero Error Migrations
- Ensures Compliance
- Integrates seamlessly into the Oracle EBS environment
- Reduces operational burden & expenses
- ROI measured in days

Do More

- Accelerate change processes: automate packaging and transfer of Oracle E-Business Suite changes between instances
- Increase system uptime: shorten scheduled maintenance windows required to apply changes in production
- Ensure compliance: enforce segregation of duties and provide complete auditability of the processes performed
- Reusable: build once and apply many
- Elimination of migration errors: guarantees accuracy providing greater efficiency
- Extendible: integrates seamlessly with ALM and Version Control Systems
- Native support: automated Oracle E-Business Suite native loaders are supported

Unitask's Migration Director *Enterprise* for the Oracle E-Business Suite provides the most advanced and cost-effective Migration solution available in the world today. Migration Director solves the time consuming and continually error-prone manual process of migrating objects between instances in today's advanced Oracle Enterprise. Migration Director *Enterprise* dramatically reduces operation burden and ongoing costs while increasing productivity and security immediately.

Pay Less

At Unitask, we believe it takes more than just advanced technology to be successful; it takes a whole new way of doing business. While others merely offer software packages, Unitask provides a complete Migration Management strategy that is economical and ensures success. Since our inception, our sole focus has been Oracle EBS. We understand and have solved the most common migration management challenges facing the enterprise today. Delivering unmatched expertise and capabilities through service, support, technology—that's the Unitask advantage.

It's all about U!

“Unitask allowed us to have seven projects in one production environment. The fact that they were flexible to our needs and demonstrated multiple instances within one test environment was extremely helpful. It helped us a lot in terms of (saving) time, effort, and money.”

*–Patrick Moran,
Emulex*

Solutions

- **Installs directly into the Oracle Instances** no additional hardware, software or security to set up and learn.
- **ZerroError Migrations** eliminates the manual scripting required to migrate AOL Setups, Customizations, OA Framework, Discoverer Objects, XMLp Objects, Forms, Reports, Java Code, Java Classes, Files, Concurrent Programs, PL/SQL Packages , SQL Scripts, Host Commands, Workflows, and Schema Objects.
- **Ensures Integrity** Migration Director’s FlexControl technology freezes the objects contained in the change package to ensure that the components cannot be modified or changed without recompiling the package.
- **Granular Change Control** Migration Director allows you to control who can migrate, what they can migrate and where they can migrate changes to and from.
- **Enhanced Audit Trail** with each change package a detailed report is generated listing all the entities and sub-entities that will be affected by applying this change and provides automated change documentation and reporting.
- **Impact Analysis** analyzes the effects of a change before it is migrated and applied to a target instance.
- **Package Level Rollback** allows a change package to be reversed back to the original state before the change was applied.
- **Change Modifications** each change package is controlled with our FlexControl technology to allow existing packaged to be modified and reused while maintaining a complete package version history.
- **Packages of Packages** simplifies release management and staging of new instances by consolidating multiple change packages into a single master package to be applied.
- **Advanced Integration to Version Control Systems** Migration Director further extends your control when checking in or out of your Version Control System with support for Labeling, Revisions and the ability to version your AOL setups.

About Unitask

Unitask is committed to helping organizations implement, manage and run their Oracle E-Business Suite. Unitask creates, sells and supports software products based on experience gained from over a decade of implementation projects. Customers of the Oracle E-Business Suite around the world rely on Unitask products to eliminate implementation and operational risk, improve the quality of the application and accelerate time-to-value.
