

FOR IMMEDIATE RELEASE

Unitask Software Announces Migration Director Elite: *Unitask Provides Low-Cost Approach for the Enterprise to Address the Manual Challenges of Packaging and Deploying Changes*

Cincinnati, OH—March 25, 2010—Unitask Software, a Gold member of the Oracle® PartnerNetwork and a leading provider of solutions for Oracle® E-Business Suite customers, today announced the immediate availability of Migration Director Elite, an enterprise class solution that automates the laborious and tedious process of implementing changes within the Oracle E-Business Suite. Designed to speed deployment while eliminating site specific custom programming that is often error prone, Migration Director Elite from Unitask continues to deliver on the company's promise of "Do More—Pay Less" solutions sets.

"Change is a constant for every sized organization in today's market, large or small," said Dale D. Royal, Unitask Chairman and CEO. "As most organizations are only now beginning to feel relief from the world wide economic downturn, being able to accommodate change and compress the time to realizing benefit is essential to facilitating business alignment and recovery."

With this introduction, Unitask extends its leadership for Enterprise Change and Migration solutions in the Oracle E-Business Suite marketplace. Delivering an ROI most often achieved in less than six months, Migration Director Elite is an Oracle E-Business Suite module add-in that allows burdened technical resources to respond quickly to demands for change by business users, as well as required upgrades and changes between systems.

The Migration Director Elite module is designed for optimizing required operational processes which must be performed before a system can be put online. This automated approach provides for increased system uptime and shortened maintenance windows, while alleviating operational strain on staff. Oracle E-Business Suite resources are empowered to effectively apply routine changes in a completely controlled and managed way with automated utilities that would otherwise have to be employed manually. The elimination of migration related errors and the ability to reapply environment configuration once tasks are completed helps organizations ensure accuracy and efficiency with a lean staff, while still supporting native Oracle E-Business Suite operations.

"With our announcement today, Unitask continues to lead in the elimination of operational challenges organizations face in the implementation and deployment with the Oracle E-Business Suite. With the release of Migration Director Elite, Unitask has provided a low-cost entry point for both small and medium sized businesses (SMBs) as well as those companies whose budgets may still have not recovered from the worldwide economic downturn," continued Royal.

About Unitask

Unitask is committed to helping organizations implement, manage and run their Oracle E-Business Suite. Unitask creates, sells and supports software products based on experience gained from over a decade of Oracle E-Business Suite implementation projects. Customers of the Oracle E-Business Suite around the world rely on Unitask products to eliminate implementation and operational risk, improve the quality of the application and accelerate time-to-value.
